Please help stop climate change.

Dear Prime Minister Carney,

We students from Sunnybrook School request to please help stop climate change because the earth is getting hotter, and hotter because of us humans.

Firstly, if the earth keeps getting hotter, the icebergs will keep melting, and if all the ice melts, the water will rise by 230 ft. Cities on the coast may get flooded, and there are a lot of cities on the coast.

Secondly, as the Prime Minister of Canada, you can help slow down global warming by preventing people from going to Antarctica because Canada has the most tourists visiting Antarctica. Visiting Antarctica has a big carbon footprint, and tourists can affect wildlife.

Lastly, you can help stop deforestation by telling people to plant more trees. If you tell people to plant more trees, we will have more oxygen, which is good, because when icebergs melt, there will be more tornadoes, hurricanes, and other natural disasters. Thank you for your time.

Yours Sincerely, Clara
