Subject: Please help stop Climate Change

Dear Prime Minister Carney,

My name is Kiara Gupte, and I am in 4th grade at Sunnybrook School. I believe that since you are the Prime Minister you have almost complete controll over Canada. In this letter, I would like to tell you about the global event called Climate Change.

First of all, I would like you to limit the amount of Canadians that

open factories in Canada. I want you to do this because, if less factories are opened, then less Carbon Dioxide, Nitrous oxide, and Methane will be released into the air. If less of these gases a released, then we will have cleaner air to breathe.

Secondly, the earth will become very hort. This will happen because, a thick ring of gases will form around the earth trapping heat from the sun around earth. In the future, it will rain less causing sea levels to rise, as tall of the Statue of Liberty's torso!

To fix this, you can get people to plant more trees, and open less factories like I said before.

Thank you for considering my request

Yours Sincerely, Kiara.
