Please help stop Climate Change

Im Amelia from Sunnybrook School

Priminister Carrey, can you please help stop climate change its hurting our planet and we have no other planet to go to. Im asking if you can consider some of my ideas.

Deforestation is 11% of climate change, which harms our breathing so we should plant more trees, for example, every year we can plant 5 trees as a family.

Another reason why we should plant more trees is caused by deforestation making less

oxygen in the air, so then there is more carbon dioxide in the air so the people with asthma will have a hard time breathing.

Deforestation is hurting animals and their habitat so can we stop cutting down trees and start planting more.

Thank you for taking time out of your day to read my letter if you can consider any of my ideas it would be great.

sincerely, Amelia
